Discovering Cambo
There are many paths you can follow throughout the Estate. Here are two favourite routes to get you started . . .
Woodland Walk
This walk follows the route of Cambo Burn through the woodland towards Cambo Sands, passing the decorative iron bridges, which date from the 1800s, along the way. Xxkm
Estate Walk
This route follows the perimeter of Cambo Estate, taking you past Cambo Farm and close to the village of Kingsbarns before skirting the coast along Kingsbarns Golf Links. Make your way back to The Stables Visitor Centre by joining the Woodland Walk. Xxkm
Please respect the private properties you come across on the estate.
1 The Stables Visitor Centre
Dating from 1760, the Stables are home to the Visitor Centre. Start your visit here and explore the exhibition, relax in the cafe and find out how you can get involved.
The Stables Visitor Centre is open daily 10am – 5pm.
2 Walled Garden
Once a productive kitchen garden, today the Walled Garden is filled with experimental beds growing plants from all over the world.
The Walled Garden is next to The Stables Visitor Centre. Turn over for a map of the Walled Garden.
3 Cambo Gas Works
In the woodlands is a small gas works that once produced gas to light Cambo House and Stables. It was probably built for the new house between 1879-84.
You can view the Gas Works from outside.
4 Curling Pond Hut
The tennis court was once a curling rink, dating from the late 1800s. The rink's Curling Hut still survives with a small fireplace and boxes for curling stones.
You can enter the Curling Pond Hut.
5 Dairy
The Dairy was designed as a Picturesque feature to be admired from Cambo House. It contains eight stalls similar to those in the Stables.
You can view the Dairy from outside.
6 Dovecote
There has been a dovecote at Cambo since 1759. The 9th Earl of Kellie added castellated parapets to the Dovecote as part of his designed landscape in the early 1800s.
You can view the Dovecote from outside.
7 Mausoleum
The Mausoleum was built in 1821 as the burial chamber for the Erskine family under the direction of the 9th Earl of Kellie.
You can view the Mausoleum from the path.
8 East Newhall Farm
East Newhall was one of two 'Improvement' farms on Cambo Estate developed in the 1790s. Today it is home to Kingsbarns Distillery and Visitor Centre.
The Distillery is open to the public.

Background Information

These walks have been developed by the Monday Walking Group which meets at the Cambo Stables each Monday morning at 9.30am, weather permitting.

The group walks are in association with Walking Scotland, a National Walking and Wheeling charity, whose purpose is to encourage walking by providing a framework for organised walking groups.

Walking Scotland use both terms walking and wheeling as it's more inclusive. Both words represent the action of moving at a pedestrian's pace, whether or not someone is unaided or using some kind of wheeled mobility aid.

The Walk Leaders have received appropriate training to ensure the walks are suitable and risk assessed for all attending, including those who use wheeled devices.

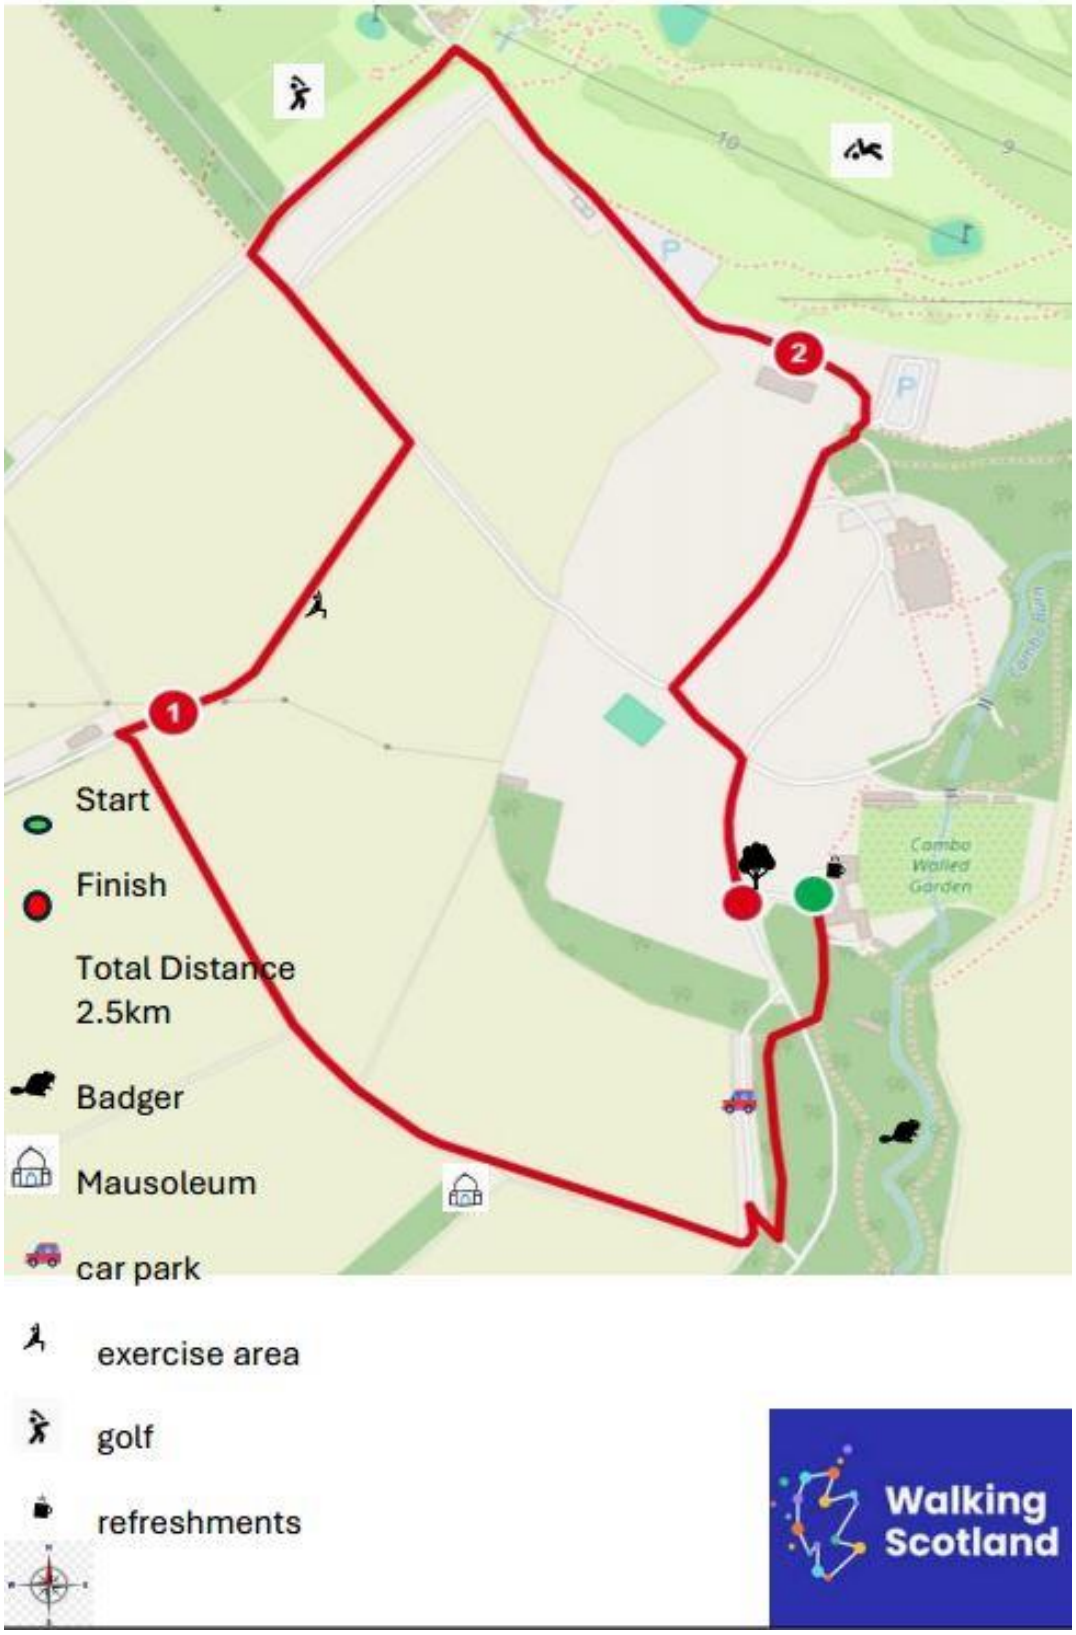

The walks are short, safe and social where the aim is to walk at a pace that we are able to talk.
They last approximately 1 → 1¼ hours and between 1 → 5km in length.

Depending on weather conditions, the paths may be slippery in places.

Cambo Gardens are managed by the Cambo Heritage Trust with its' simple aim for Cambo to be a place 'where people and plants grow'.

Walking Scotland

Cambo Mausoleum Walk

Mausoleum Walk

General Description:

This walk takes you from the Stables Visitor Centre heading south to the end of the car park then turn right onto a path made of large chips. Presently, this path is not suitable for any wheeled devices.

Approximately half-way along this path, the Mausoleum is on the left-hand side. Access can be gained most of the time unless a special event is taking place. The Mausoleum was built in 1821 as the burial chamber for the Erskine family.

Further along this path there are fields on both sides where roe deer can be seen crossing and grey herons are regular visitors. At the crossroads turn right, then left and right again on to a tarmac road taking you (quietly!) past the golf practice area. Just before the Clubhouse, turn right and, with the golf course on the left, head towards an Estate storage compound. Care should be taken passing through as this area contains items of machinery, logs, pallets etc.

After this compound turn right in the direction of Cambo House and follow the path keeping Cambo House on the left. Arriving at a T-junction, directly opposite are the tennis courts, that were originally a curling pond, alongside which is the Curling Hut where the curling stones were stored. The Curling Hut is open to view.

Turn left and with Cambo House on the left, the road sweeps to the right and the walk ends under the chestnut tree at the entrance to the Stables Visitor Centre.

Pathway Conditions:

The chipped path near the start of the walk, although wide enough, is not suitable for a wheeled walking aid. Throughout the remainder of the walk the path remains firm in most weathers.

Interesting Features:

Wildlife, Mausoleum, golf facility, tennis courts, Cambo House.

Cambo Health Walks

Walk Leader Agreement

*We will always try to make the walk safe for you by doing a risk assessment

*We will describe the route and any hazards to you before we start walking and will let you decide how far you want to walk

*We will try to make sure that all staff and volunteers have done the Walking Scotland Walk Leader training course

*We will try to find a walk that is suitable for everyone

Walking Scotland use both terms walking and wheeling as it's more inclusive. Both words represent the action of moving at a pedestrian's pace, whether or not someone is unaided or using some kind of wheeled mobility aid.

Walker Agreement

* I will only do the walk if I am fit enough. If I have any concerns about this I will talk to a Walk Leader or a health professional

* I will tell a Walk Leader if I feel unwell while out on a walk

* I will let a Walk Leader know if I am leaving the walk before it has ended

* It is up to me to make sure I can do the Health Walk safely

* I understand that I come on a Health Walk at my own risk

Walking Scotland

Walking Scotland use both terms walking and wheeling as it's more inclusive. Both words represent the action of moving at a pedestrian's pace, whether or not someone is unaided or using some kind of wheeled mobility aid.

Strength & Balance

THE BACK KNEE STRENGTHENER: 1

Do this one standing in front of a bench or table.

Stand up tall and bend one knee, bringing your foot **slowly** towards your bottom Hold for a low count of 3. Keep the knee of the bent leg slightly behind the knee of the straight leg

Return to the starting position slowly.

Again, try this 5 times on each side at first and build up to 10 times with each leg.

KNEE BENDS: 2

Stand facing the bench or table as before.

Place your feet shoulder width apart. Bend your knees and squat down by about 10cm (4") by bending your knees. Come up and repeat. Keep your back straight and don't let your knees extend over your toes.

This exercise will strengthen the big muscles in your hips and thighs, and will improve your balance. This can help when climbing stairs, walking, or bending to speak to someone.

Try this exercise 5 times and build up to 10 repetitions as you get stronger. You could also hold the squat for a few seconds.

CALF RAISES WITH SUPPORT: 3

Stand facing the bench or table as before.

Hold on and look straight ahead.

Position your feet hip width apart. Slowly and with control come up onto your toes, hold for a slow count of 3 and lower your heels back down.

Repeat this exercise 5 times, building up to 10 or more. As your balance improves, try holding on with just one hand or fingertips.

This exercise strengthens your calf muscles and toe joints. It helps you manage everyday activities such as hanging out washing, or reaching up into high cupboards.

TOE RAISES WITH SUPPORT: 4

Stand tall beside a bench or table.

Hold on and look ahead. Your feet should be hip width apart. Come back onto your heels, raising the front of your feet off the floor, then lower your toes back to the ground. Don't let your body hinge at the hips, keep the body as straight as possible.

Repeat this exercise 5 times and build up to 10 or more. As your balance improves, try holding on with just one hand or fingertips.

This strengthens your lower leg muscles and will make it easier for you to step backwards, or do fun things like push your grandchildren on the swings!

SIDE HIP STRENGTHENER: 5

Stand tall beside a bench or table.

Hold on and keep your exercising leg straight, with the foot straight forward. Slowly lift the leg out to the side and return. Try and keep the body upright and only move the leg, rather than swinging over to the side.

Repeat 5 times, build up to 10 times. Swap round and exercise the other leg. Lift the leg out to the side, hold for a slow count of 3 and return.

Try to keep the body upright and only move the leg, rather than the top part of your body.

This strengthens your hip muscles and helps you with stepping up over pavements or kerbs.

SIDEWAYS WALKING: 6

Stand up tall and place your hands on your hips.

Use a support in front of you if needed such as a wall or railing. Take 10 steps to the right, pause and then take 10 steps to the left.

This exercise is good for moving in a sideways direction, for example stepping out of the way on a pavement to allow someone past.
